imsiVOICE-Mobile Provides Off Site Digital Dictation

November 22, 2011, Havertown, PA, Integrated Modular Systems, Inc. announces that imsiVOICE-Mobile has been released, with the extension of the INTEGRATOR™ (powered by InterSystems Ensemble®) to support mobile dictation with updated worklists downloaded to a hand-held voice recorder. The recorder presents the list of patients to the physician who selects a patient and dictates a report. The dictation files are uploaded to the INTEGRATOR™, merged with the RIS system, and presented to the transcriber for report preparation. This has application in the healthcare environment beyond the radiology department.

Updates will be sent from the recorder to the RIS via a docking station. Updates will also be sent via a wireless network. The Ensemble® engine brings together the orders from the hospital system, the updates from the RIS, the worklist download to the recorder, the upload of the results to the RIS and to the transcribers.

Installation is ongoing at Saint Anthony Hospital in Chicago, and was in use by end of June 2011. Grundig Business Systems has cooperated with IMSI on the development. The first user of this feature was a radiologist who provides services for high risk obstetrics.

Benefits include faster turn-around, simplicity of use, error avoidance, and high security. The data will flow through imsiINTEGRATOR™, which employs the InterSystems Ensemble® based interface engine.

About Integrated Modular Systems Inc.

Integrated Modular Systems Inc. (IMSI) is a leading integrator of medical imaging and healthcare technology solutions. For over 30 years IMSI has been engineering, installing, customizing and supporting healthcare technology solutions to meet the individual needs of clients across the U.S. With expertise in web-based products, HL7, and DICOM conformance, IMSI offers a continuum of PACS and teleradiology products and services. IMSI works with corporate partners in the industry to design and bring to market the most technologically advanced solutions. IMSI concentrates on the needs of clients,

so they can stay focused on their patients' diagnostic images. Find out more about IMSI on the internet at www.imsimed.com.

About Grundig Business Systems GmbH

With more than four million dictation systems sold and over 50 years of experience, Grundig Business Systems GmbH (GBS) is one of the world's leading manufacturers of professional dictation systems. It is the only company in the professional dictation industry to develop and produce its cutting-edge products in Germany. GBS products are distinguished by technical innovation, quality, and top-notch design. Whether for doing mobile dictation on the go, with a microphone at the PC, or for making conference recordings, dictation solutions from GBS are on the scene every day, helping attorneys, physicians, companies, and many others to get their work done efficiently and cost-effectively. The independent company, formerly attached to the parent company Grundig, was named one of the top 100 most innovative medium-sized companies by the Vienna University of Economics and Business. In addition to numerous awards for distinguished product design, GBS received the "IT Innovation Prize 2009" for the world's first wireless dictation microphone for professional use, the Dicta CordEx, by the "Initiative Mittlestand" (an initiative for medium-sized businesses).. Find out more about GBS on the internet at www.grundig-gbs.com.
